Lyrics for *Victoria Drummond - The Hero Of Errol* by P7 Errol Primary School

VERSE 1 – A Helping Hand

Let's give a Helping Hand
Everybody sit down and we'll sing you a song
Victoria used to give a hand all day long
Potato Picking, Butter Churning, Berry Picking
On her family farm
Now We have machinery to do it all
So now we just eat corn on the cob
Playing ipads all day and just look at our phones
Chilling out On the couch, we watch TV and moan
I wish I was more like...

CHORUS

Victoria Drummond, the hero of Errol
Victoria Drummond, marine Engineer
She played games just as we do
Learnt her sums and her letters
Helped bring in the harvests
Watched others work with engines
Victoria Drummond, we're following you

VERSE 2 – School

A, B, C, D, 4 x 4 is 16
To School - or Not to School
Victoria Drummond was a home schooled lass
Her dyslexia made it difficult to do maths
Now after school we go to Asda in our automatic Mazda
(calculating the household budget – on our smartphones)
She went to church and liked to pray amen
Now church on Sunday's not for everyone
She failed her exams again and again
Her chief engineers exams again and again
She took a swig from her perseverance cup
And made it through
She's inspired us, She's inspired us to never give up!

CHORUS

VERSE 3 - PLAY TIMES

Victoria Drummond when she was young
She played with her cat on the carpet all day
It was greenish blue, so as the sea it made do
Shipwreck Ahoy!!!
Kitten to the rescue with a paper life-boat
Some days she'd pack cold potatoes and boiled eggs
Cycled off down to the river
With her dog by her side, she was fishing for a gold,
and a silver fish – don't know if she caught one – but we hope that she did
Now all we do is play at fortnite
Buy adidas and nike
I wish we could be more like.....

CHORUS

VERSE 4 - CURIOSITY

Curiosity Curiosity,
I wonder what she was curious about when she was young?
Well at Megginch Castle where she grew up there were
Swords on the wall – used by soldiers – fighting for freedom
Curiosity Curiosity,
Cars crashed on the road
Cars and Engines in repair shops
Curiosity Curiosity
Sometimes at the Blacksmith watching others forging metal
At the sawmill watching spinning - I wonder how that works?
She could be anything she wanted to be, but her curiosity led her to sea,
That's where she wanted to be
She asked Mr Morton at the Engineering Works –
HOW CAN I LEARN TO BE AN ENGINEER AND GO TO SEA?
'cause that's where she wanted to be
Curiosity Curiosity,
She left to join the merchant navy, she was fantastic
In the Engine Room, got lots of medals
For saving everyone from a BIG BOOM
What are you curious about?

CHORUS

You never know we might be the next....
